## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Whiting (2,307,312).

Whiting discloses a centrifugal blower (Figs. 1, 2) comprising a base plate 1; and a plurality of blades 12 arranged on the base plate in a radial pattern to define a plurality of air passages between the pairs of adjacent blades, respectively, wherein a portion of the base plate, serving a bottom wall of each of the air passages, is formed with a plurality of through-holes 11; and wherein the plurality of through-holes are formed only in the range of approximately one-half the length of a downstream portion of the bottom wall (Fig. 1).

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Varnhorst et al. (DE 44 03 224 A1).

Varnhorst discloses a centrifugal blower (Figs. 1-5) comprising a base plate 8; and a plurality of blades 3 arranged on the base plate in a radial pattern to define a plurality of air passages between the pairs of adjacent blades, respectively, wherein a portion of the base plate, serving a bottom wall of each of the air passages, is formed with a plurality of through-holes 6.

***Allowable Subject Matter***

4. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Prior Art***

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 2 patents.

Edwards (3,165,257) and Fraser (998,889) are cited to show centrifugal fan impellers having through holes on each base plate.
